PROJECTS

Celadon (*Ruby on Rails, Backbone.js*) [Live](#) | [Github](#)

An online marketplace for Pokémon inspired by Amazon.com

- Dynamic product filtering through custom server requests & SQL
- Product-driven content and customer data (ex. number of unique views) is driven by nested associations
- Formulated custom AJAX requests for placing current user orders.
- Focus on UX/UI through responsive buttons and an integrated header

Falling Balls (*JavaScript, HTML Canvas*) [Live](#) | [Github](#)

A single player arcade game

- Integrates vectors/gravity for ball bouncing physics
- Updates player high scores through AJAX server requests

Tronsnake (*JavaScript*) [Live](#) | [Github](#)

A two-player remake of two classic arcade games - Tron and Snake

- Utilizes jQuery listeners for controls and mechanics
- Built for scalability (adding more snakes) and easy property changes

Chess (*Ruby*) [Github](#)

A terminal-based chess game against the computer

- Implemented through OOP, applying multi-class inheritance for DRY code
- Applied move algorithms to validate moves and detect for checkmate

SKILLS

Ruby	Rails	JavaScript	jQuery	CSS
Backbone.js	SQL	Git	HTML	TDD

EDUCATION

07/2015 - 10/2015

App Academy
